

Company Profile

About KAWAMURA

Japan is highly regarded as one of the most technologically advanced countries in the world. One company stands in its commitment to the Japanese spirit of manufacturing, taking up challenges with advanced technologies.

In 1919, a small company was established in the thriving manufacturing city of Seto, Aichi Prefecture.

This company was created by a founder who envisioned the future as the oncoming age of electricity.

For over 100 years, this company—Kawamura Electric Inc.—has developed technologies and products dedicated to enhancing the safety and security of electrical systems.

○ Events in Japan
● Events in foreign countries

Our business covers three main areas:

"Infrastructure Production", "Life Solutions", and "Business Innovation". We at Kawamura pursue first-class quality through our power management technology. Peering into the future, we will create a new sense of security and peace of mind. Always, close at hand, we aim to be of service to everyone around the world.

Infrastructure Production

Infrastructure development is our core business. We deal in cubicle-type high-voltage power receiving equipment, commercial power distribution boards, and other power receiving and distribution facilities that are vital for providing safe and secure electricity. We are also engaged in handling monitoring devices for electrical enclosures and telecommunications equipment, while operating power electronics-related business as well. The power electronics-related business has been attracting worldwide attention in recent years.

Life Solutions

We provide solutions that help improve safety in your daily life, including everything from residential distribution boards and electrical outlets with a fire prevention system, to delivery boxes and other products that build convenience into your daily life.

Business Innovation

We develop systems and devices that support your new business by helping you achieve better customer satisfaction, promote work style reforms, and enjoy greater productivity, while also enhancing information security.

High Voltage Power Installations

Top class domestic share in Japan

Kawamura has produced High Voltage Power Installations for over fifty years, earning the company a top share in the Japanese market.

Distribution Board Development

Pioneers

We are proud pioneers in developing residential distribution boards that are now commonly installed in homes.

Awarded for 16^{straight} years

at the electrical equipment products competition held at the largest electrical equipment exhibition in Japan

* JECA FAIR 2007-2023

Preserving Cultural Properties

In order to support a sustainable society, we donate fire prevention outlets to cultural facilities, which contribute to preserve Japan's priceless cultural properties.

KAWAMURA's Mission

Active Defense

For a changing World, a New Sense of Security

As the times change, new risks and worries arise.

Yet, our daily lives are filled with preciousness we seek to protect.

*Abundant energy resources. For a world bright and warm.
Giving families peace of mind. Keeping harmony between people.*

*For a changing world,
Kawamura develops devices that
provide people with a sense of security and protection from
hazards.*

*Understanding the times. Reading the future.
Rather than solving problems after they occur,
we focus on preventing problems from materializing in the first
place.*

*"What might happen next?" "How should we respond?"
These are the questions we are constantly asking and answering.*

*The more that people treasure in life,
the greater their happiness.
Protecting all that people need protected
-this is our mission.*
